Why Companies Choose Balbix

The Balbix SaaS platform ingests data from your security and IT tools to create a unified view of cyber risk in dollars, while maximally automating the continuous identification, prioritization, dispatch, and mitigation of vulnerabilities.

Move beyond siloed tools, qualitative decision-making, and manual workflows to mitigate cyber risk faster.

Just a Few of the Companies That Have Upgraded to Balbix

StanleyBlack&Decker	Fortune 25 US Telco	oerlikon	CooperStandard	Par Pacific
Fortune 50 Pharma Giant	CARVANA	Master	Greenhill	Top 5 Global Aluminum Producer

Gartner peer insights **4.9/5 Rating**

Companies That Upgrade to Balbix Say

"Time is of the essence to win in cybersecurity, so we invest in tools and architectures that give us a speed advantage. Balbix provides us with real-time security posture visibility, vulnerability prioritization, and reduces our MTTR for issues."

— Daniel Gisler, CISO, Oerlikon

"Balbix is an industry leading platform that consolidates cyber risks into a single reportable model. This technology is enabling us to scorecard our risk remediation performance and gain continuous visibility into open security issues."

— Rhonda Gass, CIO, Stanley Black & Decker

"Balbix provides best-in-class security risk assessment and inventory of equipment. The functionality of the system itself exceeds that of all others that we have reviewed."

— AVP Technology, F25 US Telco

Balbix's Top Strategic Differentiators

Unified Asset Inventory

Gain accurate asset visibility across on-prem and cloud by analyzing data from existing tools. Speed up vulnerability and risk management 10x with real-time search and detailed asset attributes.

Risk-Based Vulnerability Prioritization

Prioritize your tasks based on dollar-denominated risk, calculated using asset-level data about vulnerabilities, threats, installed security controls, exposure, and business criticality.
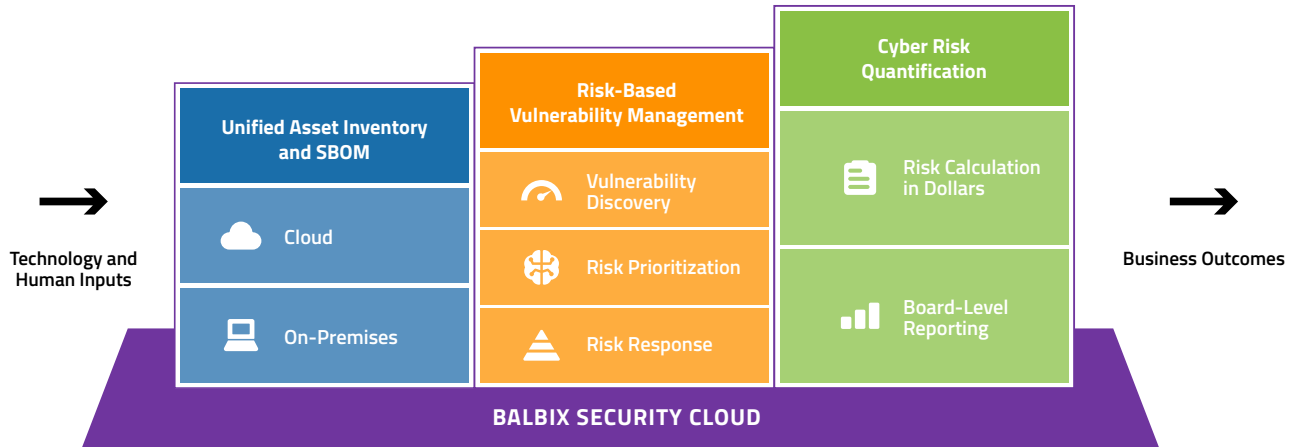

Risk Reduction from Automation

Reduce cyber-risk by 95% with maximally automated workflows for finding, prioritizing, assigning, dispatching and mitigating risk issues. With SaaS, deployment is quick and simple.

C-Suite and Board Reporting in dollars

Help your executives and board understand cyber-risk in dollars broken down by owners and risk types. Highlight ROI of your security investments and showcase progress.

Organizational Gamification

All stakeholders get the right info, metrics and tools to do their part in mitigating cyber risk. Change your culture from "security is the CISO's problem" to "security is everyone's business".

Exceptional Customer Support

Our goal is to be your best and most responsive partner as you evolve your security program. And we deliver! That is why we have a Gartner Peer Insights rating of 4.9/5.
